

Caddy[®] Mig C200i

Portable MIG/MAG welding unit with built-in wire feeder for Ø200 mm spools

For tradesmen – repair, maintenance and assembly welding of mild steels, aluminium and stainless steels as well as brazing. This easy to use, intelligent and powerful unit offers excellent welding properties and is easy to take along to the job at hand. Great if you are welding in the workshop or on the move.

Advanced design gives you options

Advanced and modern materials provide lightweight, durable and impact resistant housing with inbuilt cable wraps for ease of transportation. The low weight of 11.5 kg makes it easy to move to different indoor or outdoor worksites.

Applications

The performance of this unit makes it superb for a large variety of applications. Weld mild steels, stainless steels or aluminium. MIG/MAG brazing of galvanized plates is another application. Solid or gasless cored wires can be used. A versatile unit for repair, maintenance or assembly work in the workshop, outdoors or at different sites. Single phase mains connection makes it easy to find an electricity supply. Works equally as well when powered by a portable generator*

QSet™, the intelligent arc setting

Set the plate thickness, test weld for a few seconds and the unit will automatically set the welding arc. QSet™ will always maintain the best welding arc. QSet™ provides easy machine setting and will ensure consistent quality and ease of operation. Conventional setting of wire feed speed and voltage is also possible.

*To obtain full output use a 6.5 kVA portable generator with automatic voltage regulation

Applications

- Repair, maintenance or assembly work
- Agricultural applications
- Auto-repair
- Light metal fabrication
- Transport
- Education
- Household and furniture
- Tack welding
- Use with an automatic voltage regulated generator

More welding power than ever before

The PFC (power factor correction) gives 30 % more welding power from the same fuse size.

Description

Caddy Mig C200i is an efficient inverter power source. Under the side panel there is a built-in wire feeder and a holder for the wire spool. In this compartment, polarity change can also be done, for optimal welding with gasless cored wires.

Spool type needed

Wire spool size: inner diameter 51 mm, external diameter 200 mm and width 55 mm.

Recommended ESAB wires

OK Autrod 12.51, Ø 0.8 (0.6 & 1.0) for welding of mild steels. **Coreshield 15, Ø 0.8** for gasless welding of mild steels. **OK Autrod 19.30, Ø 0.8** (1.0) for MIG /MAG brazing. **OK Autrod 308LSi, Ø 0.8** (0.6 & 1.0) for 18Cr 8Ni stainless steel welding. **OK Autrod 316LSi, Ø 0.8** (0.6 & 1.0) for stainless steel welding. **OK Autrod 5183, Ø 1.0** for aluminium welding.

- Can weld mild & stainless steels, aluminium, as well as MIG/MAG brazing
- QSet™, intelligent arc setting, ensures consistent quality and makes it easy to use
- Has PFC (power factor correction) and complies to European Harmonics demands = uses energy efficiently – lots of power.
- Easy to change polarity = possibility to use gasless cored wire
- Fitted with ESAB, high quality, MXL180 torch, 3 m long
